Colour

Created by Genevieve Lake, last modified by Davyd Geyl on 22 Dec 2020

Colour brings our designs to life. Our use of colour is versatile and used to express emotion & tone, as well as place emphasis and create associations. Colour should always be used in meaningful and intentional ways to create patterns and visual cues for everyone.

Rationale

The following colours are inline with brand refresh 3.0. This saw a reduction in the overall colour palette (4 to 3 themes) and simplification of colour usage (i.e. all interactive content = blue theme).

User friendly names were chosen as a way to easily identify the colours.

Key Terms

Term	Definition
Colour Value	The Hex value for each colour (from colour positioning)
Swatch	Example HTML swatch for each colour
Role	The usage for each colour (includes Aliases)
Previously known as	If this colour had a previous naming convention.

Accessibility

A Colour Safe Accessibility Matrix tool is provided to help explore accessible colour combinations for digital and provides the calculated contrast ratio for AA / AAA compliance.

Interactive version

Contrast Grid

Test many foreground and background color combos for compliance with WCAG 2.0 minimum contrast.

Include one color per line, with an optional comma-separated label.
