Grid - Sketch Specifications

Created by Alex Dewez-Lopez, last modified by Genevieve Wang on 01 Sep 2020

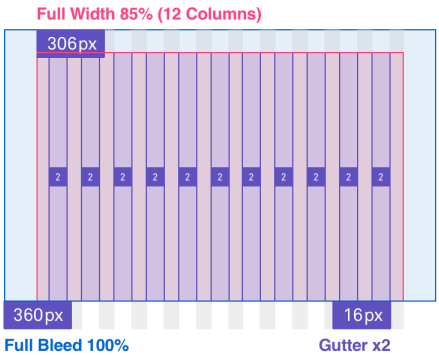
Responsive Grid

Consistent use of a grid system provides the foundation for harmoniously and consistently positioning elements onscreen.

Layout Grid

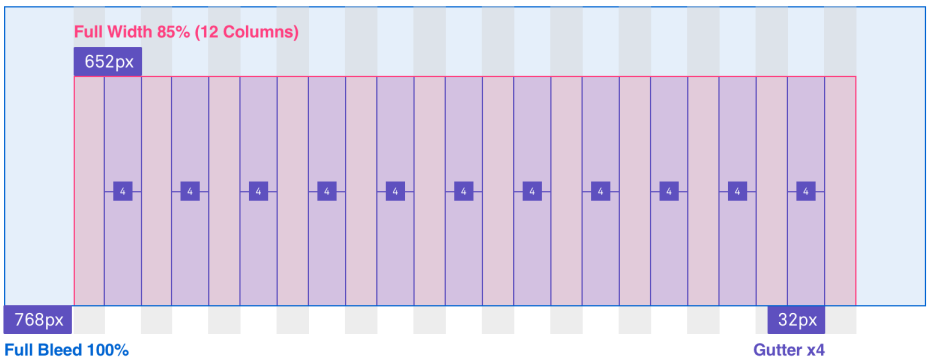
viewportXS (0 - 767)

- **360px** Screen Width
- **85%** Container (306px)
- **16px** Gutter Width
- **12** Columns (11px*)



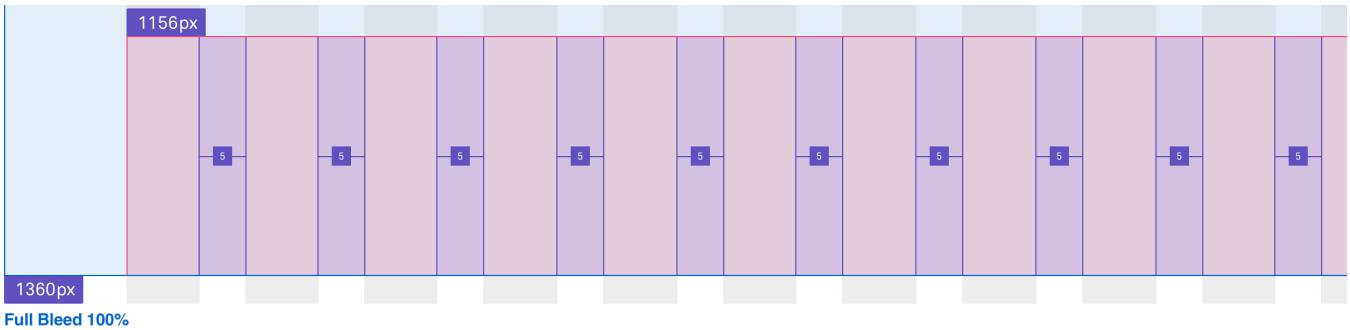
viewportSM (768 to 1023)

- **768px** Screen Width
- **85%** Container (652px)
- **32px** Gutter Width
- **12** Columns (25px*)



viewportMD (1024 - 1679)

- **1360px** Screen Width
- **85%** Container (1156px)
- **40px** Gutter Width
- **12** Columns (60px*)



viewportLG (1680+)

- **1680px** Screen Width
- **85%** Container (1428px)
- **56px** Gutter Width
- **12** Columns (68px*)

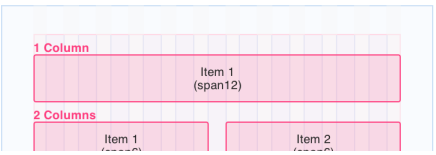
Layout

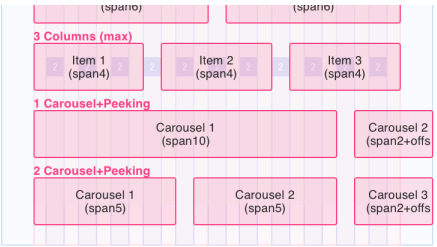
Consistent use of a grid system provides the foundation for harmoniously and consistently positioning elements onscreen.

Device Optimised Layout

XS layout



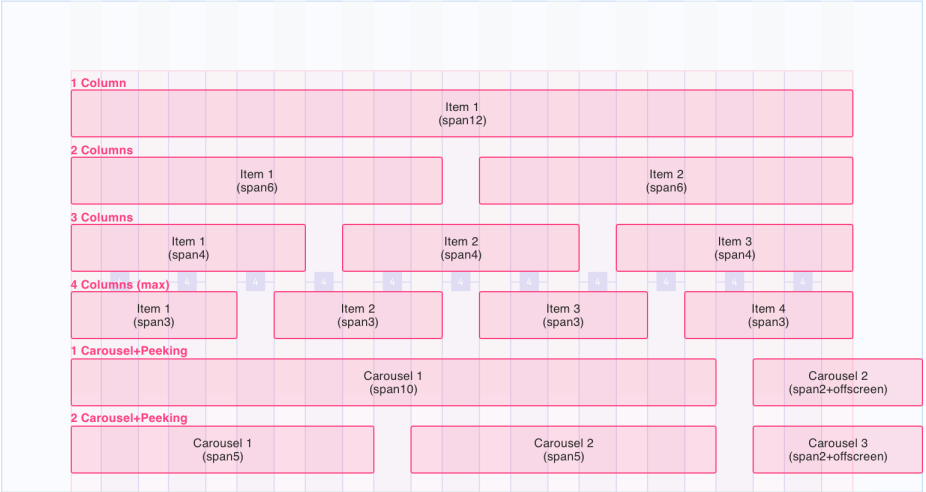
Recommend single column, stacked for small devices



Multi-columns should be used with caution at this breakpoint

Carousels must include 'peeking' content extending offscreen

SM layout

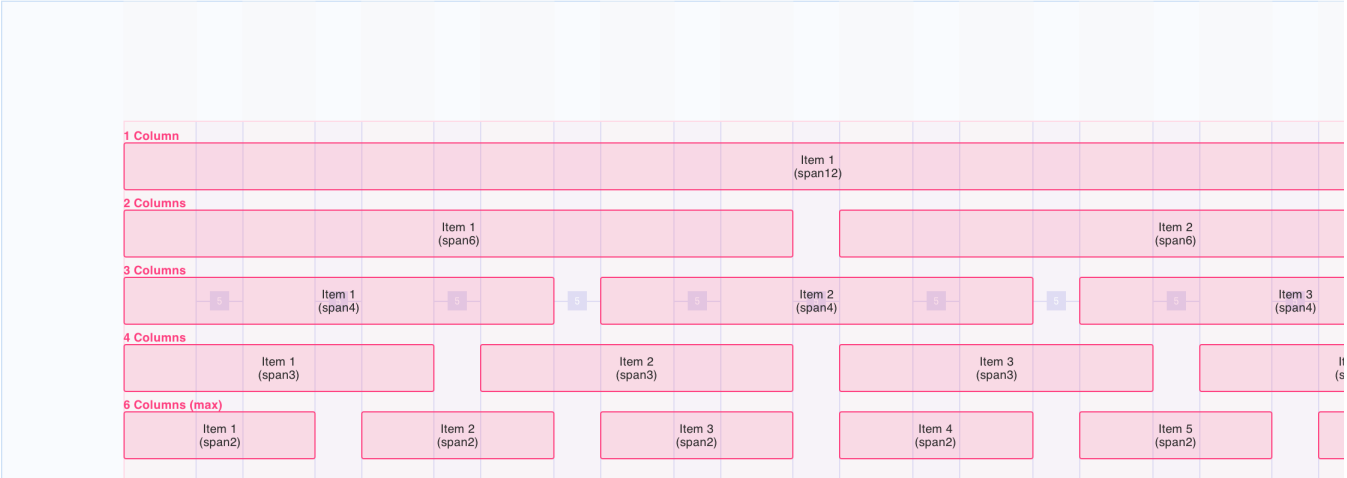


Recommend single column, 2 column layout for optimal legibility.

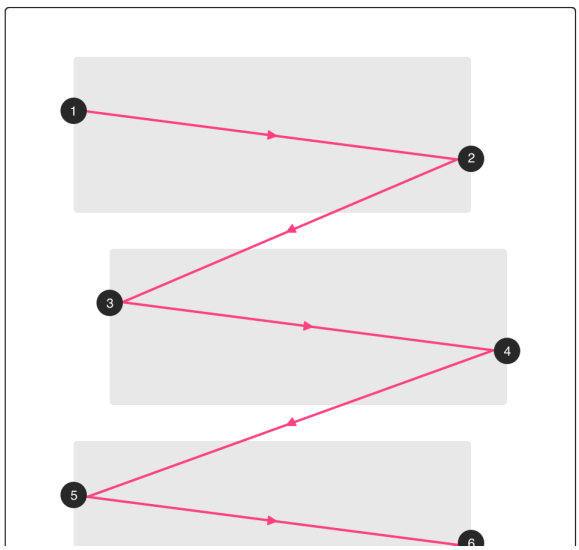
Use in moderation for supporting content requirements with minimal copy.

Carousels must include 'peeking' content extending offscreen

MD+LG layout



Asymmetrical + ZigZag Layout



Asymmetric balance

Asymmetric balance works to stagger content and direct the users gaze down the page.

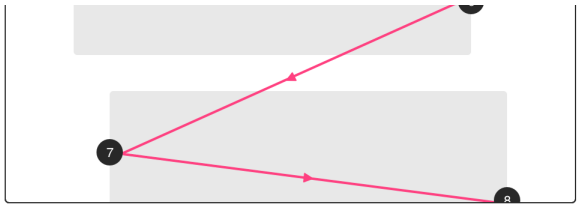
The goal is to create interesting, dynamic layouts that support a fluid, responsive content environment that creates balance across devices.

ZigZag layout

A zig zag layout is a format that is designed to work with the eye natural pattern following a Z-letter direction.

That is:
First, eye goes from left to right
Next, eye goes down and to the left
Last, their eyes move back across to

The result is a dynamic



the right again

Peeking Content

Content peeking is revealing a small part of the next module across viewports to keep users scrolling.

any device and keeps us
