Accessibility

Screen reader

Scenario Outline: User focus on the textfield

When I use a screen reader AND focus on a textfield I hear the following

1. Label
2. "Required" (if field is required)
3. Help text
4. **<textfield>**

Scenario Outline: User focus on text field with input

When I use a screen reader AND I return focus to the invalid text field I hear the following

1. input
2. **<textfield>**
3. Label
4. Help text

Scenario Outline: User focus on text field in error state

When I use a screen reader AND I return focus to the invalid text field I hear the following

1. Label
2. “Error”
3. <error>
4. Help text
5. **<textfield>**

Text Resize

Increase text size to largest possible on device in OS settings

Expected results

- Textfield remains visible on screen
- All text associated with textfield is visible and readable

No labels
