On This Page

- Rationale
- Paragraph Spacing
- Line Width
- Alignment

Text styles refer to a set of typographical styles which contain a base font as well as additional attributes such as colour, alignment and responsive sizing. Text styles are used to build hierarchy on a screen. Using these text styles throughout our applications helps build consistency and familiarity for our users.

- iOS Catalogue app

Rationale

The set of text styles are based on audits of our current platforms and existing text styles were consolidated removing duplicates and inconsistencies.
The set provided gives teams the flexibility to create screens for different systems with a consistent hierarchy.

Paragraph Spacing

Paragraph spacing is the amount of white text between two paragraphs of text.

Standard paragraph spacing is 2 times font size. Density is also considered in the form of comfortable or tight styling.

App uses short by default for body content.

*Web only

Variation	Margin Rules	Recommendation
Long *	2x Font Size (e.g. Body 16 x 2 = 32px or 2 rem)	Articles and long form content
Short	1x Font Size (e.g Body 16 x 1 = 16px or 1rem)	Shorter content e.g. 2 paragraphs

---

Line Width

Shorter lines are more comfortable to read than longer lines. As line length increases, your eye has to travel farther from the end of one line to the beginning of the next. If the lines are too short then the text becomes disjointed; if they are too long the content loses rhythm as the reader searches for the start of each line.

The suggested line length for digital text is in the range of 50 to 75 characters on a line.

Alignment

Telstra uses Left Align for the majority of it's content.
Centre and Right Align may be considered for certain components and modules but should be used in moderation.

Alignment	Recommendation

Alignment	Recommendation
Left (Natural)	Left align (specified as Natural alignment) should be most of the time - this is the default alignment and is ideal for optimal readability
Center	Centre should be used in moderation - use only for larger / display text or to highlight something - do not use for body copy - use once per page
Right	Right align should be used in moderation
