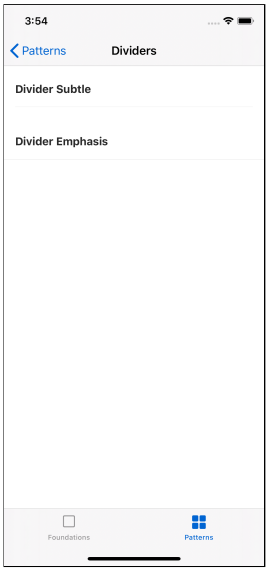
iOS Dev Guide - Dividers

Created by Peggy Liu, last modified on 11 Jan 2021

There are two types of Dividers which you can set after initiation.

Find in the catalogue app: Patterns → Dividers

You can also see the divider used on other pages in the app e.g. with SingleSelectRow and MultiSelectRow



Sample implementation in catalogue app

https://git02.ae.sda.corp.telstra.com/projects/ABLE/repos/able-ios-catalogue-app/browse/AbleCatalogue/Application/Application/Pattern/Divider

Quick Code Reference Guide:

Creating a Divider

```
//Initialise:

var divider = Divider()

//Set Divider Type:
divider.dividerType = .dividerSubtle
divider.dividerType = .dividerEmphasis

//Set constraints e.g. any insets or margins as required
```

No labels
