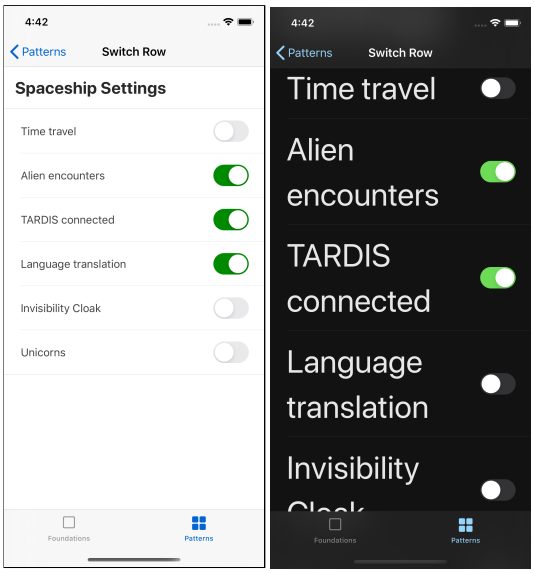
iOS Dev Guide - Switch Row

Created by Peggy Liu, last modified on 11 Jan 2021

Switch Row allows users to toggle a mobile setting between two binary options, usually on and off states.

Find in the catalogue app: Patterns → Switch Row



Light normal vs Dark large accessibility text

Sample implementation in catalogue app

https://git02.ae.sda.corp.telstra.com/projects/ABLE/repos/able-ios-catalogue-app/browse/AbleCatalogue/Application/Application/Pattern/TextArea

Quick Code Reference Guide:

Creating a Text Area

```
//initialise:
let switchRow = SwitchRow()

//Set properties
switchRow.labelText = "toggle this if you dare"
switchRow.isOn = false //default is false

//create handler as needed
let stateDidChangeHandler: ValidationHandler = { state in
                print("Unicorns exist is is \(state)")
            }

switchRow.stateDidChangeHandler = stateDidChangeHandler
```

No labels
